Over the course of the last 18 months Serve the City Brussels together with Dublin City Volunteer Centre, Volunteer Scotland and Volunteer Centre Osijek have been involved in a Europe for Citizens Project funded by the European Commission.

Whereby volunteers across the four countries took part during a six month period, in projects to measure the impact volunteering has on shared EU values.

With this exhibition we want to share the culmination of the project by showcasing the diversity of individuals through photos, that took part in the project and their activities across the four European countries that were involved.

Also the event will continue the conversation about the impact volunteering can have on volunteers themselves, their individual values and the community.
